We just made recycling a whole lot more rewarding

We turn more of your recyclables into new products and make the choice to recycle easy. See your impact and earn rewards.

Get started

We're so transparent, we're basically naked.

Recycling makes us feel good, but few know what actually happens to a plastic bottle after we drop it into a bin. We're here to reduce the damage of disposal and ensure that waste is properly recycled… with full transparency

Why does this matter?

Typically, 40% of what's put in the reccyling bin is never recycled. It's sorted and thrown out, partly due to contamination – a common issue that occurs when recyclables are mixed together in the same bin!

Where do we come in?

We built our own recycling process to make sure your recyclables change hands directly from our carriers to manufacturers who effectively reuse and recycle your items.

So what are you waiting for?

We recognize your efforts to save our planet so we want to ensure that your efforts translate into transparent and trackable results. See for yourself.

Transparency all the way

Redeem rewards

Get started

Recycling reinvented.

One of the most daunting issues humanity faces is a mounting waste problem, which not only pollutes the environment but also obstructs public health and threatens to drown poorer nations in unimaginable and irreparable toxicity.

At Asta Works, we strive to reduce the damage of disposal. Reduce and reuse is always best but if that's not an option, recycling is the move. Unfortunately, 60% of what's put in the recycling bin ends up in the landfill. Yep, not great. That's why we created a new process that reinvents recycling as you know it; by accepting pre-separated waste, we guarantee that more gets recycled, thus keeping the earth healthy and happy. You're welcome.

Not sold yet? We've simplified recycling by offering free pick-ups straight to your door, at the tap of your phone. Your recyclables amount to redeemable points with participating brands and our manufacturing partners utilize the materials to produce upcycled goods. Waste is effectively reused and our air, earth and oceans revert to their unspoiled beauty one plastic bag at a time. Let's keep it natural (as it should be.)

Our mission is to save the planet and reward you in the process.
Think outside the box… and recycle it.

Download our mobile app

our mobile app is available for iOS and Android devices and is free to download.

Start collecting

Verify your recyclables with our list of accepted items – be sure to separate by category!

Schedule a pick-up

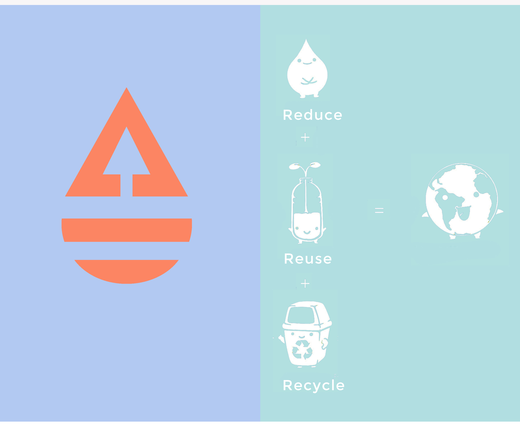
When you're ready, simply schedule a pick-upon the app or drop off your recycles in a designated bin if you live in a partner building

Track your impact

Use the app to keep track of your impact – your recycled waste turns into redeemable points that can be used at any of our partner brands.

A better process

Currently, of all the waste that is consumed, only 30% gets put into the recycling bin. From that, 60% is sent to the landfill. We built a better process that accepts separated materials to certify that your recyclables actually get recycled, allowing us to provide more transparency and data, effectively encouraging more recycling.



You already know this but just in case…

The environmental change sweeping the planet is occurring at a faster rate than previously predicted, making it imperative that we act now to reverse the otherwise unimaginable damage. Yes, the statistics are shocking. Recycling is an easy and effective way to help us combat ecological deterioration.

Landfills

3,000 active landfills and 10,000 old landfills regularly pollute air and water supply in the U.S.

Oceans

By 2050, there will be more plastic waste than fish in the world's oceans

Climate Change

U.S. landfills annually emit the equivalent greenhouse gas emissions of 124 coal-fired power plan

Natural Resource Scarcity

Natural resources have experienced a proliferation in demand and are being depleted by overconsumption
